

# Innovation and Creativity in Coaching and Mentoring

4th July 2018, London

**Our conference this year approaches the themes of creativity and innovation from a number of angles, including:**

- \* Exploring how we can innovate our profession and practice through embracing new technology
- \* Adopting a more creative approach to business development, including working with and learning from Millennials
- \* How to be more creative in what we work with and draw from in our coaching sessions
- \* Explicitly working with art
- \* Being more creative with scant resources to embed an organizational coaching culture
- \* 'Working in supervision' to reveal our blind spots so we can be more creative

This is our eighth annual conference since we changed hands in 2009, and we're maintaining all the hallmarks of the success of our previous sell-out conferences. Stimulating speakers; plenty of choice of interesting, practical & experiential workshops/case studies/research sessions, and what many of you say you value the most- the opportunity to network and be in conversation with peers in a self-contained friendly setting at the Holiday Inn Bloomsbury in central London. And the perfect finish to the day- our annual awards where you can help celebrate the achievements of colleagues- or your own!

We look forward to seeing you for a rich and diverse day of inspiration, exploration, and learning.

## Speakers to include:

- \* **Professor Ernesto Spinelli**, (pictured) keynote on opening creative possibilities through embracing uncertainty
- \* **Anna Sheather**, art in coaching
- \* **Katherine Chowdry**, British Transport Police case study
- \* **Tim Dench**, Euroclear case study
